

## 1. Опыт

. -MMMMMMMMMMMMMMMMMM- .  
 -MMMMM` . . . . .`MMMMM-

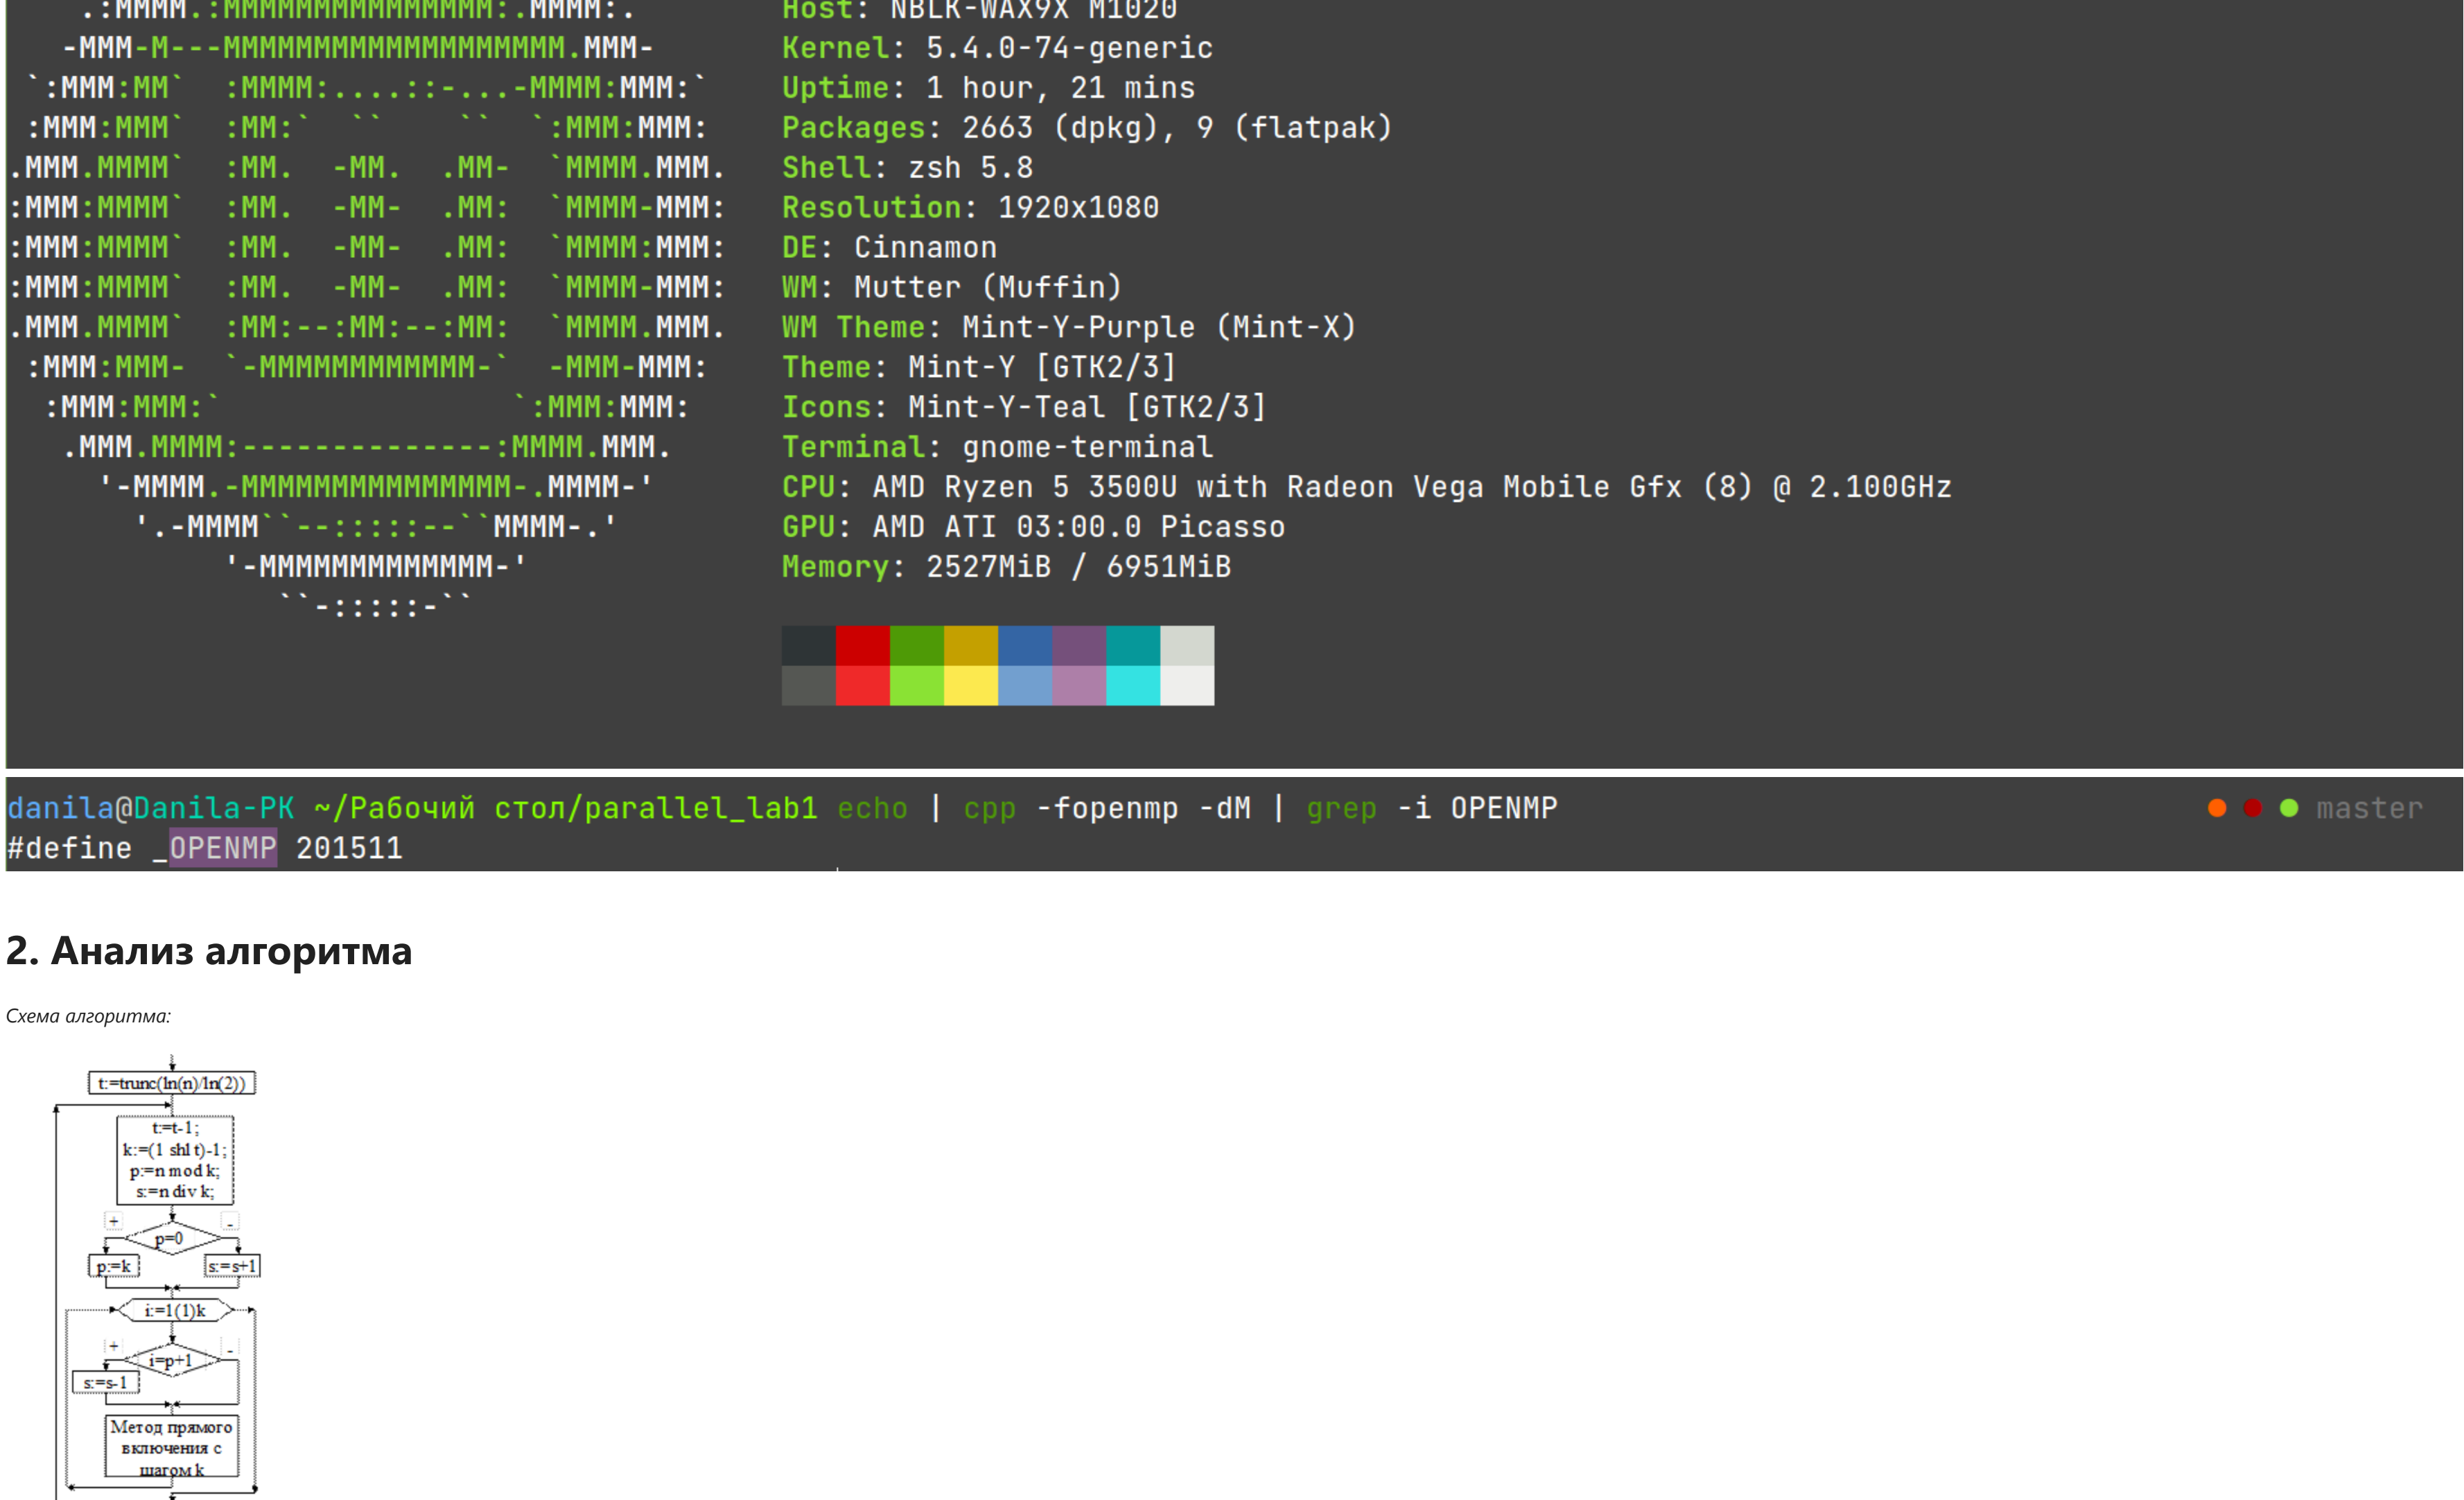

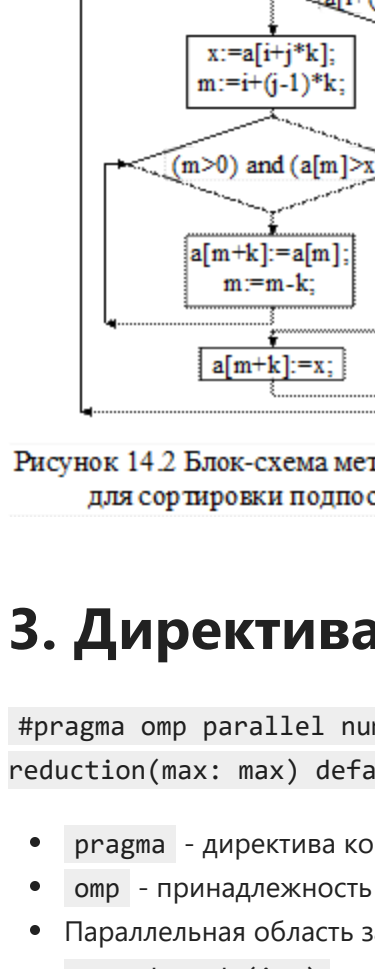

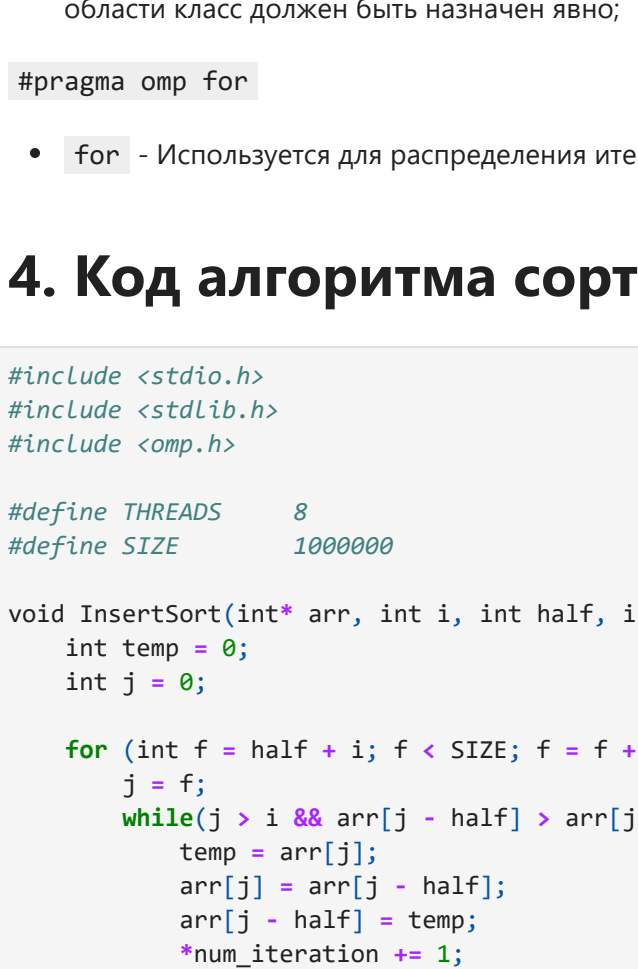

Рисунок 14.1. Блок-схема алгоритма Шелла

[illegible]

- `shared(list)` – задаёт общий список

1

```
int h;  
int i = 0;  
float t_start, t_end, t_total;
```

```
for(h = 0; h < h_total; h++)
    for(h = SIZE/2; h < h; h = h/2) {
        #pragma omp parallel num_threads(j + 1) shared(array, h, t, tser) default(none)
        {
            #pragma omp for
            for(i = 0; i < h; i++) { InsertSort(array, i, h, tser); }
        }
    }
    t_end = omp_get_wtime();
    t_total = t_end - t_start;
    times[j] = t_total;
}
}
```

2. Массив, который практически полностью упорядочен (5.2);
3. Массив, упорядоченный в обратном порядке (5.3);

### 5.1 Абсолютно случайный массив

- ```
int* Random_array(int rand_seed) {
    int* rand_arr = calloc(SIZE, sizeof(int));
    srand(rand_seed);
    for (int i = 0; i < SIZE; i++) { rand_arr[i] = rand(); }
    return rand_arr;
}
```

### 5.1.2 Общее количество итераций

```
int* Correct_array(int rand_seed) {
    int* correct_arr = calloc(SIZE, sizeof(int));
    for (int i = 0; i < SIZE; i++) { correct_arr[i] = 1; }
    srand(rand_seed);
    int magic_nus = 1000; //0.2% from all elements willn't be in rig
```

```
for (int i = 0; i < magic_n; i++)
    int target1, target2;
```

```
target2 = rand()
```

```

        correct_arr[target2] = correct_arr[target1];
        correct_arr[target1] = tmp;
    }
    return correct_arr;
}

```

5.2.2 Общее количество итераций в данном типе массива:  
 For almost correct ordered array number of iterations = 5408348

### 5.3 Абсолютно неупорядоченный массив

5.3.1 Код для генерации:

```
for (int i = 0; i < SIZE; i++) {
```

1

For wrong ordered array number of iterations = 51466272

#### 5.4 "Странный" массив

5.4.1 Код для генерации:

```
int* strange_array(int rand_seed) {
    int* strange_arr = calloc(SIZE, sizeof(int));
    srand(rand_seed);
    int repeating_elem = rand();
    for (int i = 0; i < SIZE; i++) {
        if ((i < SIZE / 2) & strange_arr[i] == repeating_elem; }
```

```
}
return strange_arr
```

63206

```
for string_id in range(0, iterations // iterations_per_batch):
